EXECUTIVE PROFILE

Lead Developer | Data Engineer | Doctorate

Lead developer and doctoral student with eight years of IT experience designing, building, and optimizing data solutions across healthcare, government, and consulting industries. Proven track record of developing secure and scalable ELT/ETL workflows in a variety of tech stacks including Azure, Hadoop, SQL, and Python. Currently conducting doctoral research on leveraging ambient listening technology to reduce administrative burden and documentational overhead for small to midsize healthcare practices. Dedicated to bridging advanced data engineering with human-centered research to deliver transformative, real-world healthcare innovation.

Areas of Expertise

- Cloud Platforms
- Data Engineering
- API Integration
- Data Governance
- Agile & DevOps
- Patient-Centered Innovation
- Predictive Health Insights
- Information System Validation
- Technical Training
- Database Optimization
- Systems Integration
- Research

PROFESSIONAL EXPERIENCE

Clinic Scribe, Houston, TX | Lead Developer

June 2024 – Present

- Designed and developed the MVP for Clinic Scribe, an AI-powered clinical documentation tool that transcribes patient-provider conversations and generates SOAP notes using OpenAI Whisper and GPT-4.
- Built a live audio transcription service pipeline using Streamlit, web rtc, and Whisper in Visual Studio, enabling real-time, browser-based recording and transcription.
- Integrated OpenAI's GPT-4 API to automatically convert clinical transcripts into structured clinical documentation.
- Implemented multilingual transcription support across 50+ languages, improving accessibility for diverse clinical settings.
- Deployed the app on Render with version-controlled codebase using GitHub and virtual environments.
- Designed and documented scalable deployment workflows on Azure App Services, ensuring reliability, authentication integration, and HIPAA-aligned infrastructure setup.
- Developed and connected a React-based front end with an Azure backend infrastructure, enabling seamless API communication for transcription, note generation, and secure data handling.
- Established early-stage security practices aligned with HIPAA and SOC 2 readiness documentation.
- Worked closely with the founding team to test early adoption through landing pages, waitlists, and user interviews.
- Configured Azure Blob Storage for encrypted storage of clinical transcripts and documentation, integrating upload/retrieval workflows with the React UI.

Suvida Healthcare, Houston, TX | Data Engineer

July 2023 – May 2024

- Engineered and maintained 20+ scalable ELT pipelines in Azure Synapse, ensuring efficient and reliable enterprise data processing.
- Ingested data from SFTP servers, Salesforce API, and Snowflake API into Azure Data Lake Storage Gen 2 utilizing Azure pipelines and applied transformation to be used within enterprise data lake environment.
- Loaded data from ADLS2 into staging tables in SQL Server by utilizing pipelines and dataflows in Azure Synapse Analytics .
- Developed PySpark notebooks in Azure Data Factory for querying REST APIs and writing their JSON payload SQL Server tables.
- Utilized Azure DevOps for tracking user story progress in sprints and Azure Repos for version control.
- Implemented CI/CD workflows in Azure DevOps to automate deployment of pipelines, improving release speed, consistency, and reducing manual errors.
- Operated Data Build Tool for implementing version control, testing, and freshness checks for SQL tables.
- Performed QA during enterprise-wide Snowflake migration to ensure data integrity, consistency, and reliability.
- Developed complex SQL queries to join multiple tables by leveraging natural keys using common table expressions.
- Reduced pipeline failure rate by implementing advanced storage event triggers based on blob creation.

Ifraz Ahmed | PhD Student, Purdue University

Capgemini, Houston, TX | Insights and Data Consultant

January 2022 – March 2023

- Key role in integrating inventory management, transactions, order history, and service scheduling with GK POS, CAR, and SAP Commerce APIs to create seamless experience for employees and customers.
- Successfully facilitated client communication through end-of-day email updates, FDD tracker, and FSD progress charts.
- Refined data strategy document to identify existing SAP integrations, new SAP integrations, and integrations requiring enhancements between inner-circle and outer-circle implementations.
- Developed meeting minutes during the requirements gathering phase for understanding client needs between systems and business processes.

General Assembly, Houston, TX | Associate Instructor (Contractor)

October 2022 – October 2023

- Delivered supplemental instruction to Fortune 500 employees for mastery of Python, PostgreSQL, Microsoft Power BI, and Excel.
- Assisted students in gaining a fundamental and technical understanding of data science and analytics.
- Provided additional instruction to individuals falling behind by providing support for homework and projects.

Internal Revenue Service, Houston, TX | Hadoop Developer

June 2021 - August 2021

- Successfully enhanced existing processes and methods for aggregating and utilizing operational data to support IRS operations.
- Exhibited skills in engineering ETL workflow between IRS Server and Hadoop EdgeNode SCP connection.
- Designed and implemented documentation using the white paper methodology for easy replicability of the SparkR environment.
- Performed transformations and actions on SparkR DataFrames for statistical analysis, validation, program stability, and performance improvements. Contributed in improving processing time while enhancing the stability of R code through the implementation of SparkR.

University of Houston, Houston, TX | Instructional Assistant

December 2020 - May 2021

- Provided supplemental instruction for MBA and MS students in Quantitative Analysis.
- Assisted students in understanding and internalizing fundamental concepts in Quantitative Analysis.
- Collaborated with professors to highlight key topics discussed during class for supplemental instruction.

Love & Joy Personal Care Home, Houston, TX | Computer Systems Admin

May 2020 - May 2021

- Responsible for all documentation, maintenance, and upgrades related to information systems software.
- Implemented a data repository to provide security for patient and employee information.
- Managed and performed analysis on all donors using Snowball Fundraising platform.
- Created an enterprise-wide policies and procedures orientation packet for onboarding all new employees.

Harris County Public Health, Houston, TX | Business Intelligence Intern

Jun 2021 - Aug 2021

- Developed Microsoft Power BI reports visualizing at risk populations within Harris County.
- Created scalar functions and stored procedures in SQL Server to validate data contained within Power BI.
- Developed a Python script to extract veterinary public health data into Python, apply transformations for data clean up, and upload back for use within data warehouse environment.
- Leveraged four fuzzy logic algorithms to give a confidence rating on how close an input matches a record.
- Presented insights and conclusions to key stakeholders and executive directors within Harris County.

Cars for Less, Marietta, Ga | IT Specialist

Feb 2014 - Jun 2018

- Maintained proprietary car dealership software (Frazier) which included inventory management, accounting suite, and customer database.
- Performed data entry for paperwork such as Bill of Sale and financial contracts.
- Followed up on online marketing sales leads by contacting potential customers and setting up appointments if the customer is interested.
- Greeted and actively listened to customers to uncover purchasing needs and provide recommendations based on automotive requirements.
- Researched new automotive sales data to maintain knowledge on new products and trends.

Ifraz Ahmed | PhD Student, Purdue University

EDUCATION

Purdue University, Doctorate in Technology

December 2027

- Proposed topic: *Toward Trustworthy AI in the Workplace: A Multidimensional Framework for Transparency, Perceived Fairness, and Ethical Use in Employee Evaluation and Training*
- Wrote paper exploring how cloud platforms have democratized technology for small to mid-size companies by offering ready-to-deploy solutions for a range of business needs.
- Produced a paper detailing three different competency models and how they are leveraged in the food and beverage service industry, non-profits, and government agencies.
- Developed a paper to explain similarities and differences between the three most recent generational cohorts, Baby Boomers, Generation X, Generation Y (Millennials), and Generation Z.
- Authored a paper examining cybersecurity in healthcare, including government regulation, EMR security practices, universal health data sharing standards, and the implications and consequences of data breaches.

University of Houston, Master of Science in Business Analytics

December 2021

- Imported, preprocessed, and split original dataset into training and test sets using Python.
- Built a Multi-Layer Perceptron model with backward propagation, L2 regularization, and sigmoid activation function.
- Collaborated with three other students to perform analysis on countries in Asia and North America exceeding 50,000 cases after March 15 to determine leading factors in cases and deaths related to COVID-19.
- Ingested data into HBase, created an external table in Hive, and connected data contained within HBase to Hive using Hive API.
- Determined the strongest indicators of success for countries are timely government response, strong healthcare infrastructure, and widespread testing.

Georgia State University, BBA in Computer Information Systems

May 2018

- Plugged in source code from GitHub into IBM Watson to predict an individual's personality traits from sample text entered by the user.
- Created visual recognition application by invoking IBM Watson API and connecting to code found on Bluemix.
- Team leader responsible for upgrading the existing systems in Golf Course Country Club that is experiencing increased stress on its bookings, maintenance and human resource departments due to growth in membership.
- Created mathematical and graphical models using Excel to interpret data into meaningful information.
- Developed skills that are overlooked in business such as active listening, how to have unpleasant conversations, and working across cultural and ethnic differences.

ACADEMIC HONORS AND DISTINCTIONS

Dean's List for Academic Excellence, University of Houston – Recognized for outstanding academic performance in fulfilling the requirements of the Master of Science in Business Analytics degree. Awarded to students with a 3.7 GPA or higher.

Civic Digital Fellowship – Selected for the prestigious Civic Digital Fellowship program where I was given the opportunity to work as a contractor for the IRS. Primary responsibility involved leveraging Hadoop and SparkR to enhance and adapt existing R programs for

Ifraz Ahmed | PhD Student, Purdue University

seamless integration and improved performance with SparkR. This role required a deep understanding of both data engineering and computational optimization, and I successfully implemented solutions that increased processing efficiency and scalability within federal data systems.

President, MBA Society – Lead meetings for clubs within MBA Society to develop recruiting initiatives for increasing membership and enhancing member experience. Facilitated panel discussions with industry professionals to empower members with information about skills needed to stand out in the job market.

Study Abroad Scholarship, Georgia State University – Selected for a competitive scholarship to help fund study abroad at Nantes Université in France. Analyzed business case studies throughout various countries and identified tangible factors of success from companies such as Bank of Santander and Li & Fung Distributors. Networked with students and faculty to increase cultural awareness and understand cultural differences. Adapted to a new country with a foreign language by developing valuable intercultural communication skills. August 2016 – January 2017.

TECHNICAL

- **Cloud & Big Data:** Azure Synapse Analytics, Azure DevOps, ADLS2, Snowflake, AWS, Hadoop, HDFS, Hive
- **Programming & Scripting:** Python, R, Shell Scripting, Advanced SQL (Window Functions, CTE), Unix/Linux
- **Data Processing and Analytics:** ELT/ETL, Azure Data Factory, Data Pipeline Development Data Mart Development
- **Visualization and Analysis:** Seaborn, Scikit Learn, Power BI Dashboard, Business Analysis
- **Development Practices:** Agile, Version Control, CI/CD, Pipeline Orchestration
